Dr jerry tennant healing is voltage pdf

© 2022 Tennant Products powered by Greta Rose Agency At the height of his career, the unthinkable happened. Being one of the first surgeons in the US to place intraocular lenses in eyes after cataract surgery, he was unaware that viruses existing in a patient's eyes could possibly be passed on to the surgeon.Each time Dr. Tennant performed surgery, the laser would strike the patient's eye and release viruses that drifted upward through his mask and into his nose and brain. In time, he developed encephalitis and a bleeding disorder that manifested as spastic movements and an inability to remember even how to write a prescription. Diagnostic tests confirmed he had three viruses in his brain, but no one knew how to treat them. Dr. Tennant's physicians told him there was nothing that could be done to help him.So, on November 30, 1995, he was forced to retire at the height of his career.For seven years, mental fog and fatigue took over and Dr. Tennant would sleep for 16 hours a day. There would only be 2-3 hours per day when he could think & read until he suddenly would no longer be able to understand what he was reading. He gradually began to realize that it was up to him to find the answers since modern medicine didn't have any.As he learned more, he started to understand the importance of learning how to get a single cell to work correctly. If he could do that, in time, all of his cells would work correctly.Each of the cellular biology books he read gave passing reference to the fact that cells function in a narrow range of pH, but said little more. Dr. Tennant began to look closely at pH. He came to realize that in addition to acidity and alkalinity, pH measures the voltage in a solution.Dr. Tennant began to understand that cells must have enough voltage to work and that chronic disease is associated with loss of voltage. His next step was to find out how to measure the voltage and keep it at optimal levels. Following this path, he was finally able to heal himself naturally.Dr. Tennant also teaches and lectures worldwide for Senergy Medical Group, the exclusive distributor of his patented Tennant Biomodulator® PLUS & PRO. These FDA-accepted, non-invasive devices are designed to offer healthcare professionals and home users affordable drug-free and user-friendly options for the indicated use of symptomatic relief for chronic, severe, and intractable pain, and adjunctive treatment in the management of post-surgical and post-traumatic pain. The countless thousands of success stories and testimonials of patients' recovery and pain reduction are phenomenal. Every cell in the body is designed to run at -20 to -25 millivolts. To heal, we must make new cells. To make a new cell requires -50 millivolts. Chronic disease occurs when voltage drops below -20 and/or you cannot achieve -50 millivolts to make new cells. Thus chronic disease is always defined by having low voltage. This book tells you how to measure your voltage in each organ, how to correct it, and how to determine why your voltage dropped enough to allow you to get sick. by Dr. Tennant Every cell in the body is designed to run at negative 20 to negative 25 millivolts. To heal, we must make new cells. To make a new cell requires negative 50 millivolts. Chronic disease occurs when voltage drops below negative 20 and/or you cannot achieve negative 50 millivolts to make new cells. Thus chronic disease is always defined by having low voltage. This book tells you how to measure your voltage in each organ, how to correct it, and how to determine why your voltage dropped enough to allow you to get sick. BUY ON AMAZON " " " " " " " " " " This website uses cookies to personalize your experience and target advertising.. By continuing to use our website, you accept the terms of our updated policies Dr. Tennant's book Healing is Voltage™ .The Handbook is included with every purchase of a Tennant Biomodulator®. A tireless researcher and medical practitioner, Dr. Tennant has been on a life-long journey to find better ways to have and enjoy a healthy lifestyle. Whether you suffer with a chronic illness and have intractable pain, are a health care provider that wants to do more for your patients or you are in pretty good health and want to stay that way, this book was written for you! This handbook provides an in-depth discussion about the way your body was intended to work, with updated research and information. Dr. Tennant provides the historical context for understanding why our bodies get sick and what is required to get well. "Every cell in the body is designed to run at -20 to -25 millivolts. To heal, we must make new cells. To make a new cell requires -50 millivolts. We get sick when our voltage drops below the operating voltage of -20 millivolts and/or you cannot achieve -50 millivolts to make new cells. Thus chronic disease is always defined by having low voltage. The voltage of my thumb is -25 millivolts. When I hit it with a hammer, it goes to -50 millivolts so it can make new cells to replace the damaged ones. The vessels dilate so building materials can be dumped into the area to make new cells. Thus the thumb is red, swollen, warm and has a pulsing pain. As soon as it finishes making enough cells to replace the damaged ones, it goes back to -25 millivolts and all is fine." "However, if I run out of voltage before I finish making enough new cells to replace those I damaged and my voltage drops to say -10 millivolts, I am stuck in chronic disease because it requires -50 millivolts to make new cells. The only way I can get well is to insert enough electrons to get up to -50 millivolts, otherwise my thumb won't work properly and will hurt all the time. Chronic pain is a symptom of LOW voltage". See ourArticles page. This book tells you how to measure your voltage in each organ with the Tennant Biomodulator®, how to correct it, and how to determine why your voltage dropped enough to allow you to get sick. Dr. Tennant introduces his concept of BioTerminals® to aid in your understanding. He also includes valuable information about our medical healthcare system, a historical perspective that helps you better understand why our bodies are not working properly and a discussion on nutrition, what is good and what is not good for your health, especially in myth-busting information we've often believed to be true (but it's not!). Some of the other topics include neurotoxins, cholesterol and heart disease, hypothyroidism and obesity, infections, dental toxins, allergies, heavy metal poisoning, alkaline water, essential oils, emotions, Tennant Biomodulator® PLUS and the Biotransducer™ CrystalWave. Dr. Tennant's writing is easy to understand and blends the knowledge from the vantage of both a highly trained medical professional and patient, as his extensive research came from his own journey from life-threatening health issues to improved health. Just released Healing is Voltage™-Acupuncture Muscle Batteries-An Atlas and Cancer's On/Off Switches - Polarity The purchase of a Biomodulator® includes Healing is Voltage™ .The Handbook as well as 2 days with Dr. Tennant at one of his Integrative Healthcare Conferences. Further details on our Training page.Understanding how the body works and Healing is Voltage™ presentations can be viewed on our Video Page. These videos will give you a different understanding of why voltage in the body is so important to good health and well- being. Dr. Tennant's presentations will give you a refreshing perspective on how the body works energetically and how we can reduce pain and improve health. Our body and cells need a specific amount of energy (or voltage) to work. Without proper voltage, your body can't heal. We use physics to heal you naturally. Meet Dr. Jerry Tennant How do you describe a Renaissance man?Genius, scholar, inventor, humanitarian, innovator, healer, teacher, entrepreneur, historian — these are just a few of the terms that describe Dr. Jerry Tennant whose remarkable life, dedicated to healing and innovation, has changed the paradigm of western medicine.Today, people travel from around the world to consult with the Tennant Institute for Integrative Medicine. Dr. Tennant also teaches and lectures worldwide for Senergy, the exclusive distributor of his patented Tennant BioModulator® PLUS and PRO. These FDA accepted, non-invasive devices are designed to offer healthcare professionals and home users affordable drug-free and user-friendly options for the indicated use of symptomatic relief for chronic, severe and intractable pain; as well as adjunctive treatment in the management of post-surgical and post-traumatic pain. The countless thousands of success stories and testimonials of patients' recovery and pain reduction are phenomenal. Learn More about Dr. Tennant Personalized care for you.We care about your healing journey and will use knowledge of Eastern and Western medicine and special tools including the Tennant BioModulator® and Tennant BioTransducer® to restore and maintain your health. Our special team of health staff will evaluate your needs and recommend a health protocol for you. SCHEDULE AN APPOINTMENT TODAY Our ProcessThe videos below explain exactly how a full energy evaluation and treatment are performed at the Tennant Institute. We also offer a la carte services if you are unable to commit to a full evaluation at this time. Do you have enough voltage in your system for your body to heal? At the Tennant Institute, we determine this by doing baseline testing of your overall voltage, the performance of each polarity, and a test to measure how your body is processing heavy metals. This gives the doctors information on what physical challenges your body is facing when it doesn't have the underlying power to operate and regenerate healthy cells. Using physics to return your body to the range of voltage to heal is achieved by correcting your polarities with a Tennant BioTransducer, and recharging with the FDA accepted Tennant BioModulator. This device is used with simple hand-grips and foot-plates that effectively deliver frequency voltage into your system. The devices used daily is key in keeping your body in a healing state. Once the doctors have determined your overall voltage measurements, they then begin the investigation of why your voltage dropped. There are five areas we focus on that consistently will cause a drop in body voltage: dental infections, thyroid and hormone imbalance, emotional energy, scars and toxins. During your time at the clinic, you will meet with Drs. Marshall and Faldmo to investigate and resolve these issues that often serve as the root cause of disease. Learn from our health staffDr. Tennant and the other health staff at The Tennant Institute have put together numerous videos to discuss different conditions and what the clinic can do to assist. Please explore these videos and contact us when you are ready to start your health journey. Words from our health team: "When traditional medicine could not heal me from an infection that put me in bed for seven years, I pursued every measure of healing I could find to heal myself. That is how my journey with Eastern and Western medicine began. I've spent the past 25-years sharing these healing techniques." "Dr Tennant's protocol, thyroid misbalancing is one of the components that needs to be addressed and corrected in chronic disease." "I work daily to continueDr. Tennant's legacy. His healing theories are what saved me from a life-threatening illness at the age of seventeen." Don't know where to start?Contact us so we can help you figure out where you should start on your healing journey.
